

Leverett Village Coop Board
Statement of Intent

MaryJo Johnson

I served on the board of the High Falls Food Coop in High Falls NY for five years, and as president for two years. As President I introduced the Carver Method for Policy Governance and a consensus based model for decision making that incorporated board, management and staff. It made decision making a lot easier and working together a lot more fun.

As an acupuncturist, herbalist and massage therapist with previous experience working in Human Resources and nonprofits, I have a broad vision for individual, community and environmental health. I appreciate and want to support: Organic and local agriculture; making healthy food more desirable and affordable; community, family and friendships; and food cooperatives as a vehicle for creating a more just and peaceful world.

I would like to be part of helping Leverett Village Coop to spread the love as a great place to work, volunteer, eat, shop, hang out, share ideas and celebrate; making our little corner of the universe a healthy, resilient, happy and equitable place.
